

## EPOXY WALL COATING

### SAFEGUARD YOUR BASEMENT AGAINST *WATER & MOLD*

#### FIGHT MOLD GROWTH *PROMOTE BASEMENT HEALTH*

While many basement wall coatings claim to “waterproof” walls, these claims fall short. Homeowners end up applying coats of “waterproofing,” year-after-year, only to have water problems reappear. With its 2-component adhesive formulation, MoxyEpoxy+ penetrates the wall’s surface, curing rapidly to create an exceptionally strong bond. It is also breathable, helping it to achieve a long lasting finish on all types of masonry wall surface. Your basement walls will be clean, healthy, and dry.

#### MOLDY OR *LEAKY BASEMENT?*

Mold spores, allergens, and various bacteria can have a tremendous impact on your health, triggering asthma and other serious respiratory concerns. MoxyEpoxy+ has been specifically formulated with an anti-microbial admixture, to fight mold growth and promote basement health. Plus, MoxyEpoxy+ is the only wall coating made to withstand an amazing 40 psi of water pressure.

### WHY MOXYEPOXY+?

**1** Penetrates to form an **exceptionally strong bond** and creates a **durable finish**

Creates a **washable, hygienic surface**

**2** **Resists** up to 40 psi of **water pressure, discoloration, and peeling**

Remains **breathable**

**3** **Mold and moisture resistant**

Creates a **long lasting dry surface**

\*For best results, Moxyepoxy+ should be installed with **full interior drainage and a quality sump pump system!**
