EVER-JACK

**UNMATCHED
STRENGTH**

Supports up to 8,400 lbs
allowable capacity.

**LIFETIME
DURABILITY**

Made from Fiber
Reinforced Composite

**CODE
APPROVED**

ICC-ES certified for
peace of mind

**FAST
INSTALL**

Adjustable and designed
for efficiency.

Ever-Jack® is a high-strength, corrosion-resistant, and adjustable fiber-reinforced composite support system designed to fix sagging, bouncy, or uneven floors in crawl spaces. Key benefits include a 5-minute, no-excavation installation, 19-inch base weight distribution (no large concrete footings required), and a 25-year warranty.

- ✔ **Unmatched Strength & Durability:** 8,400 lbs of load, featuring a 19-inch diameter base that reduces concentrated loads.
- ✔ **Fast, Easy Installation:** Installs directly on soil without needing concrete excavation, often in as little as 5 minutes.
- ✔ **Adjustability:** Offers 12 inches of vertical lift, allowing fine-tuned leveling even years after installation if soil shifts.
- ✔ **Corrosion-Proof Materials:** Constructed from advanced fiber-reinforced composite, ensuring longevity in damp crawl spaces. Evaluated for use in temperatures as low as -20°F
- ✔ **Code-Compliant:** Meets and is compliant with all ICC-ES, IBC, and IRC code requirements.
