

SRS 600 BOW GUARD

Simply the Strongest Straps

Simpson Strong-Tie URFP®
Secures Framing to Foundation

39 **546 lb**
ULTIMATE
TENSILE CAPACITY

BowGuard delivers class leading strength of commercial grade SRS-600 Unidirectional carbon fiber and ultra high strength structural epoxy to form the strongest composite bowed wall strap available.

SEAMLESS STABILIZATION

Combined with the ICC-approved Simpson Strong-Tie® Universal Retrofit Foundation Plate* with inset sill plate flexibility, and SRS-1000 Epoxy Slab Lock, these components form a continuous load-transfer path from the sill plate to beneath the slab—delivering faster, cleaner, and stronger top-to-bottom stabilization than any other system on the market.

Shear Guard Connection
SLAB LOCK

SRS 600 BOW GUARD

Simply the Strongest Straps

MINIMAL PARTS **MAXIMUM SPEED**

BowGuard delivers the fastest installation time of any system on the market.

196 000 PSI
TENSILE STRENGTH

Seismic-Certified Protection

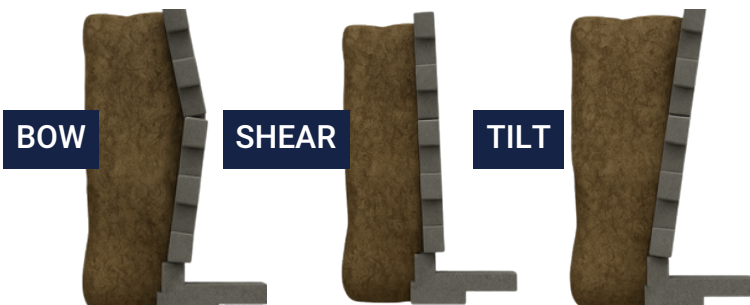

ICC-approved Simpson URFP delivers engineered, earthquake-rated anchorage — a level of structural reliability unmatched in typical bowed-wall systems.

SRS-2100 Rapid-Cure Structural Paste

Fills and locks hinge points and mortar joints with a high strength polymer that cures in 6 minutes, and keeps installation moving fast.

3-MODES OF STRUCTURAL DEFENCE

Backed by SRS Engineering & Project Support

Expert guidance, technical support, and training for stronger, compliant installations.

25 Year Warranty
When installed per SRS standards by an approved contractor.
